

Power Rejuvenator Pen (PRPen)

Patient Preparation Instructions

Your Appointment Date: _____ Your Appointment Time: _____

- Retin-A products should be discontinued 12 hours prior to treatment
- Anti-inflammatory medications such as steroids, ibuprofen, naproxen, aspirin, and acetaminophen should be discontinued 12 to 24 hours prior to procedure.
- Anticoagulant medications must be stopped at least 5 days prior to treatment – **This must be cleared with prescribing physician.**
- Avoid prolonged sun exposure at least 24 hours prior. Wear sunscreen and do not allow your skin to burn at least 10 days prior to procedure.
- If you have a history of fever blisters or shingles, begin taking acyclovir or the medication you were prescribed the day before your procedure.
- Arrive with clean skin, free of makeup.
- If you should have an acne breakout just prior to treatment, it may be wise to reschedule. Inform your physician and allow him or her to decide whether this is necessary.
